

Customer Retention & Churn Analysis Report

This report presents a detailed customer retention and churn analysis using the Telco Customer Churn dataset. The objective is to identify churn patterns, customer behavior trends, retention drivers, and actionable business recommendations for improving customer retention.

Metric	Value
Total Customers	7043
Overall Churn Rate	26.54%
Average Monthly Charges	\$64.76
Average Customer Lifetime	32.37 months
Revenue Lost Due to Churn	\$139130.85

Key Insights

- The dataset shows a significant customer churn rate, indicating retention challenges.
- Month-to-month contract customers are more likely to churn compared to yearly subscribers.
- Customers paying higher monthly charges tend to leave the platform more frequently.
- Most churn occurs during the early customer lifecycle period.
- Fiber optic internet users show comparatively higher churn behavior.
- Customers without technical support services demonstrate higher churn probability.

Business Recommendations

- Improve onboarding experience during the first 3–6 months of customer lifecycle.
- Encourage long-term subscriptions using annual discounts and loyalty programs.
- Launch targeted retention campaigns for high-risk customer segments.
- Strengthen technical support and customer service quality.
- Monitor customers with high monthly charges and provide personalized offers.
- Use predictive analytics models to identify churn risks early.

Conclusion

The analysis highlights important churn patterns and retention opportunities. By improving onboarding, customer support, and long-term engagement strategies, the business can significantly reduce churn and improve customer lifetime value.
